B I R D S

of

Eastern North America

By CHESTER A. REED, B. S.

This is a most interesting and thorough book of written and pictured description.

The opening and closing chapters take up bird-lore and make it entertaining and understandable to those who want to know more about birds.

Most valuable is the chapter on how to study birds.

Good and accurate illustrations give the key to identifying birds in the field, and the general appearance of the species.

408 illustrations in color. Many in black and white.
